About HCA – EMCC Greece

The Hellenic Coaching Association (HCA) is an inclusive, professional association for individual and corporate providers, buyers and trainers of coaching services. It was founded in 2010 and very soon it became affiliated with the European Mentoring & Coaching Council providing a strong presence for EMCC in Greece. Today the HCA has over 100 members.

We are:

- Dedicated to high professional standards and aligned with international best practices
- Inclusive of all forms of coaching
- Socially responsible & active in making coaching a vehicle for contributing to our community & society.

Our Vision

To be the frame of reference for coaching across Greece, which establishes and safeguards standards of excellence for the Coaching Profession and conveys a sense of pride among coaches.

Our Mission

We are dedicated to professional coaching and aligned with international standards, aiming to raise awareness on the value of coaching in society, to encourage good coaching practice and to keep members abreast on latest research and expertise.

Why become a corporate member?

Corporate partnerships make a big difference to the work of HCA, by contributing to our growth and sustainability. Our corporate membership scheme is a great way for organisations to meet their own objectives and challenges through coaching, while actively contributing to the future of coaching in Greece.

Corporate members have the unique opportunity to participate in the **Advisory Board** that holds an advisory and consultative role to HCA Board of Directors, where they can share their ideas, opinions, concerns and experiences on matters relating to coaching/mentoring services that are significant to the corporate world.

In addition to playing a key role in the growth of coaching in the Greek market, corporate members can support the wider socially responsible and charitable work that we do. For instance, in 2011 the HCA launched the 'Solidarity Coaching' project with the aim to support non governmental, non profit organizations to improve their results through coaching. Under this scheme, experienced HCA volunteer coaches offer customized, pro-bono executive coaching programs to members of the management teams and other executives of the participating NGOs for a set period of up to 6 months.

With the help of corporate partnerships, we are hoping to extend this pro bono program to other charities and social groups.
